Inspired  
by families  
and friends

## Conversations from the heart

## Designed to be Memorable

Families tell us when they are choosing a LifeArt coffin they start talking about their loved one's life, what they liked doing, what was important to them, and the special times and memories.

Our design team works to evoke these emotions and memories in each design.

We hope that each LifeArt design starts a conversation.

We would like to acknowledge the many families and friends who have inspired our collection of designs.

We invite you now to view our range of LifeArt coffins...

## Designed for the Environment

LifeArt coffins and caskets are made using en√iroboard patented clean coffin technology.

LifeArt products are fully functional and perform like a traditional coffin or casket, but because of their light weight they use up to 80% fewer trees and produce up to 87% less Greenhouse Gas Emissions when cremated, compared to the full lifecycle of coffins manufactured from MDF or particleboard.

Our en√iroboard technology utilises materials made from wood fibre sourced from suppliers accredited by sustainable forestry programs such as PEFC or FSC and contain a mix of virgin, recovered and recycled fibre.

LifeArt is the world's leader in environmentally clean coffin and casket technology.

## LifeArt provides a choice from value to customised

### Heritage

Timbers that look so real that only the environment can tell the difference

### EarthCare

Practical, affordable, dignified

### Life's Canvas

A single colour "canvas" for a personalised tribute

### Collections

Vivid images and colours reflecting the diversity of Life

### Design Online

The ultimate personalised farewell

For a full range of designs visit [www.lifeart.com](http://www.lifeart.com)

up to **80%**

Fewer trees are required to  
produce a LifeArt coffin\*

\*Compared to veneered coffins manufactured from MDF or Particleboard

## LifeArt Coffins and Caskets

Both coffins and caskets are available from LifeArt.
